1- Game Description

Follow the tale of Musashi, the legendary samurai, in his search for truth and glory, challenging the gods of the zodiac until his final battle with the grandmaster dragon.

The Legend of Musashi is a high volatility slot game played on a 6x4 grid with avalanche cascades, 4096 Ways to win. The game features progressive multipliers during cascades, 10 Power mode levels with expanding Wilds, and two Free Spins bonus games.

During the base game, a progressive multiplier is applied during cascades. An horizontal reel containing 10 different Power levels is presented at the bottom of the grid. Collecting scatters in a meter triggers a Power level awarding up to 10 random Lives, and for each Life, any appearing Wild is transformed into an Expanding Wild. Completing all levels, which takes around 650 scatters, launches the Supers Free Spins game.

In the base game, 3 scatters landing on the panel triggers the Free Spins game awarding 10 Free Spins. During Free Spins, the progressive multiplier is applied during cascades resetting after each spin; Wilds are always expanding, and a Scatter landing in the panel increases the multiplier base value by one, plus grants an additional free spin.

Unlike in regular FS, during the Super Free Spins game, the progressive multiplier doesn't reset at the start of each spin.

Welcome to The Legend of Musashi, a high volatility 6x4 video slot game with avalanche cascades with monster multiplier, wilds, expanding wilds, power mode, monster free spins and a super free spins bonus game with unlimited monster multiplier!

ABOUT THE GAME

For years he has honed his skills to perfection, he is the greatest master of the double blade, a katana in one hand, a wakizashi blade in the other, he is ready to meet your challenge.

The game has a 6x4 panel and 4096 ways to win. When wins are formed, the winning symbols are removed, triggering the Cascade feature. Each new cascade increases a monster multiplier by 1, and resets to 1x when there are no more cascading wins.

All symbols pay from left to right on adjacent reels starting from the leftmost reel except the scatter symbol. Wild substitutes for all symbols except the scatter. Only the highest win is paid per paying ways. Wins on different paying ways are added.

When 3+ scatters land on the reels it unlocks the Monster Free Spins bonus game.

If less than 3 scatter appears on the screen, they get collected.

Collecting 650 scatters triggers the super free spins game.

Every 65 scatters trigger the power mode feature.

Scatter collection is stored per bet level.

CASCADES

Wins trigger a cascade. Symbols producing a win are removed, symbols from cascading reels fill the gaps. Cascades will continue until there are no further wins.

POWER MODE

The player is awarded a random number of lives between 3-10.

When a wild appears on the screen, it turns into an expanding wild which uses up a life.

Power mode continues till all the lives are used.

If the number of lives are less than the number of wilds on screen, the wilds are converted from left to right till no lives are left.

In power mode, your bet is deducted for each spin.

Expanding wilds will convert all symbols in the reel into wilds except the scatter.

Each expanding wild present in the panel will consume a power life.

MONSTER MULTIPLIER

A panel multiplier increase by 1 on every new cascade and resets to 1x when there are no more cascading wins. In the super free spins game it does not reset.

MONSTER FREE SPINS

3 Scatters award 10 Free Spins. Every additional scatter awards 2 extra free spins.

Wilds are converted to expanding wilds.

The monster multiplier resets after each spin.

Monster Free Spins are played with the same bet as the activating spin.

If a scatter appears during the session, an extra free spin is awarded and the base value of the multiplier increases by one.

Free spins are triggered once any cascading wins are completed.

SUPER FREE SPINS

The same features as in monster free spins apply except the monster multiplier does not reset.

HOW TO CALCULATE WINS WITH "4096 Ways to Win"

- * To calculate the total 4096 Ways to Win win, add all the symbol wins together.
- * To calculate a single symbol win, count the number of consecutive reels that contain the symbol, starting from the left.
- * If the number of consecutive reels containing the symbol is 3 or greater counting from the left, find the corresponding win amount in the pay table.
- * If any of the reels contain more than 1 instance of the symbols, the win will be multiplied. Multiply the number of symbols on each of the reels to get the final multiplier. For example: if the first reel contain 2 symbols, the second reel has 3 symbols and the third reel has 2 symbols, the total multiplier is counted as follows: $2*3*2=12$ (total multiplier).
- * The above doesn't include any Free Spin symbols which pay scattered.
- * All Way Wins are summed together after the spin.
