HOW TO CALCULATE PAYLINE WINS

* To calculate your total payline win, calculate all payline wins and add them together.

* To calculate a single payline win, count the number of identical symbols lined up in sequence on the line starting from the left most reel.

* If three or more identical symbols are lined up, find the win value in the dynamic Pay Table. There you can find the value for all symbols for 3 in a row to 5 in a row. Only the highest winning combination per line is paid out.

* If the winning combination starts with three wilds, there can be many ways to interpret the win. In this scenario, only the highest win combination is paid out.

* The above doesn't include Free Spin symbols which do not need to be on a payline to award a prize.

* After the Free Spins round is completed, all wins are added to any win from the game that activated the Free Spins.

* There is a max win cap of 10000x.
