1- Game Description

Collect them! keep them! For these precious 7's will grow and the doors to Fortuna open!

A classic game in new robes! Piles of 7's will trigger re-spins with flying 7's until the panel is full and the final multiplier awarded! It is all about the 7's, our Precious 7's!

Precious 7 is a classic medium-high volatility Fruity- themed slot game. The game is played on a 5x4 grid and has 40 pay lines, wilds, stacked 7 symbols, re-spins with flying 7's, increasing multipliers, and a final Full house multiplier, offering a max win potential of 5500 times your bet.

During the main game, when a stack of 7's lands covering the entire reel, it triggers a re-spin and all moves to the leftmost position. Each new appearing 7 awards an additional re-spin moving to the leftmost part of the row. Additionally, a panel multiplier applies on each re-spin, increasing by x1.

When the whole panel is filled with 7's, a full-house multiplier, up to x5, is triggered. All wins are multiplied by the panel multiplier and the Full house multiplier!

5- Game Rules

Welcome to the world of precious 7!

ABOUT THE GAME

This is a classic 5x4 video slot game, with 40 paylines, Wilds, Stacked 7s and a re-spin feature with flying 7s, increasing multipliers and full house multipliers!

MAIN GAME

The main game has 40 paylines, evaluated from left to right. Only the biggest win per line is awarded. Wilds substitute for all symbols. Whenever a stack of 7s land covering the entire reel, the re-spin feature is activated.

All wins are paid after which all 7s fly to the leftmost available position (on the same row which are not already occupied by a 7) and remain sticky until the end of the re-spins.

New 7s during re-spins will trigger an additional re-spin.

When no more 7s appear on the reels, re-spins end and all wins are paid out.

When starting the re-spin feature, the panel multiplier starts at 1x.

On each subsequent re-spin, the multiplier is increased by 1.

FULL HOUSE MULTIPLIER

A full house is a whole screen filled with 7s, when this happens a random multiplier between 2 to 5 is awarded.

The full house multiplier multiplies the panel multiplier.
